

Dear Sir/Madam,
I would like to submit my testimony:

It's time to make gun owners responsible. Owning a gun is not a right, it is a responsibility. Let's make gun owners highly responsible:

I want assault weapons and high capacity ammunition magazines not just banned from future sales, but also removed from the state of Connecticut.

I want semi-automatic pistols and other high performance pistols to be banned from future sales, and also removed from the State of Connecticut.

I want all gun owners to take a gun safety test every two years.

I want mandatory storage of all guns in a safe at gun owners home or other legally approved location.

I want all gun owners liable for jail and fines should anyone other than the owner obtain their guns and commit a crime. The punishment fit to the crime committed.

I want mandatory background checks on all gun purchasers.

I want all gun sellers to be liable should they sell to anyone not deemed suitable for gun ownership; Citizens deemed suitable to be outlined (TBD) such as no mental health issues, criminal backgrounds and a level of discretion given to the gun seller, so that should a suspicious purchase take place, the gun seller has the right and the responsibility to have this person questioned as to the purpose of the purchase. Anyone suspicious must require police notification and suspension of purchase immediately until cleared by the local authorities.

I want all gun sellers to be liable for selling to criminals and all other suspicious buyers with the threat of closing their businesses, fines and even jail time.

Thank you for your time,
Sincerely,
Christa Carr
